

NDC 11534-166-15

Rx only

Sodium Polystyrene Sulfonate for Suspension

15 g

Read package insert.

SUNRISE
PHARMA

Average adult dose: 15 g (approximately 4 level teaspoons) one to four times daily in water. See complete prescribing information.

The effect must be carefully controlled by frequent serum potassium determinations within each 24 hour period. Sodium content approximately 60 mEq per 15 g.

Suspension should be freshly prepared and not stored beyond 24 hours. Dispense in tight, light-resistant containers as defined in the official compendia.

STORAGE: Store at 25°C (77°F); excursions permitted to 15°-30°C (59°-86°F) [see USP Controlled Room Temperature].
